## CLASS 4 SCIENCE

1. A healthy diet is essential for good health. It protects you against many chronic non communicable diseases. Draw a chart and write down the diet you taken in breakfast, lunch and dinner.

| Days/     | Breakfast | Nutrients<br>you<br>missed | Lunch | Nutrients<br>you<br>missed | Dinner | Nutrients<br>you<br>missed |
|-----------|-----------|----------------------------|-------|----------------------------|--------|----------------------------|
| Sunday    |           |                            |       |                            |        |                            |
| Monday    |           |                            |       |                            |        |                            |
| Tuesday   |           |                            |       |                            |        |                            |
| Wednesday |           |                            |       |                            |        |                            |
| Thursday  |           |                            |       |                            |        |                            |
| Friday    |           |                            |       |                            |        |                            |
| Saturday  |           |                            |       |                            |        |                            |

Have you taken a balanced diet ? If not then mention the nutrients that you missed in your diet.

2. Draw the structure of tooth and label its parts.
3. Taking care of tooth is very important for us. Let's do an activity with your parents .Visit your dentist for check up and note down the observation. Are your teeth healthy, if not then write down the problems and write five

ways to take care of your teeth. Also paste the prescription of your dentist in file.

4. The best way to keep your body cool this summer is by keeping your diet right. This will reduce internal heat and make you feel more comfortable with the soaring temperatures. While cold drinks and frozen desserts might seem cooling, they are not. Instead, they affect you adversely. So make a list of 10 items that help you to stay fresh and energetic during summer and also write the nutrients present in them.

| S. No. | Food items that help us to stay fresh | Nutrients present in them |
|--------|---------------------------------------|---------------------------|
|        |                                       |                           |
|        |                                       |                           |

#### CLASS 4 SOCIAL SCIENCE
